CLAIM LIST

Official

Sub N

1. (Currently Amended) A business transaction methodology, including:
offering a plurality of deals for at least one of a product and service offered by at least one seller;

inputting a plurality of price and non-price buying criteria by a buyer for the at least one of a product and service; and

outputting a list of deals in real time from amongst the plurality of deals that match the buying criteria of the buyer.

2. (Original) The method of claim 1, wherein each of the plurality of deals is based on a plurality of selling criteria defined by the seller.

3. (Previously Amended) The method of claim 2, wherein each of the plurality of selling criteria defined by the seller includes an offering criteria which defines limits of each of the plurality of selling criteria defined by the seller.

4. (Original) The method of claim 3, wherein each of the plurality of buying criteria inputted by the buyer includes an ordering criteria which defines the limits of each of the plurality of buying criteria inputted by the buyer.

5. (Currently Amended) The method of claim + 4, wherein the list of deals from amongst the plurality of deals that match the buying criteria of the buyer are the deals which the ordering criteria of the buyer match the offering criteria of the seller.

6. (Original) The method of claim 5, wherein the seller can add additional selling criteria to each of the plurality of deals.

7. (Original) The method of claim 1, wherein each of the plurality of buying criteria inputted by the buyer includes an ordering criteria which defines the limits of each of the

certain buyers of the at least one buyer by the at least one seller.

15. (Original) The system of claim 9, wherein the at least one seller can review other buyer defined buying criteria not used in the matching of the plurality of buying criteria and the plurality of selling criteria.

16. (Original) The system of claim 9, wherein the at least one seller can review other seller defined selling criteria not used in the matching of the plurality of buying criteria and the plurality of selling criteria.

17. (Currently Amended) A method of conducting a business transaction, comprising:
electronically offering a plurality of deals on at least one of a product and service for sale, each of said plurality of deals being based on different price and non-price offering criteria than each other of said plurality of deals;

electronically searching the deals on the product for sale based on a plurality of price and non-price ordering criteria;

outputting a list of deals in real time of the plurality of deals which offering criteria matches the ordering criteria; and

selecting one of the deals of the list of deals which offering criteria matches the ordering criteria.

20. (Currently Amended) An Internet business transaction system, including:
a first computer adapted to be employed by a facilitator for hosting an Internet based transaction;

a second computer adapted to be used by a buyer to link to the first computer to participate in the commercial transaction;

a third computer adapted to be used by a seller to link to the first computer to participate in the commercial transaction;

wherein the buyer places an order on a deal from the seller, the deal being outputted when a plurality of buyer defined price and non-pricc buying criteria matches a plurality of seller

defined price and non-price selling criteria.

21. (Original) A server, comprising:

a processor;

a memory coupled to the processor; and

a network interface coupled to the processor for transmitting and receiving data with at least one remote computer system;

wherein a plurality of deals for a product offered for sale electronically is stored in the memory, each of the plurality of deals having different seller defined price and non-price selling criteria, and wherein the server is configured to receive orders for the product from a plurality of different buyers via the at least one remote computer system, by providing the plurality of buyers with at least one deal of the plurality of deals matching a plurality of buyers defined price and non-price buying criteria.

Ch

22. (Previously Amended) The server of claim 21, wherein the server is configured to provide the plurality of different buyers access to view the at least one of the plurality of deals via one or more of the at least one remote computers.

23. (Original) The server of claim 21, wherein the server is configured to provide the plurality of different buyers with deals that the buyer defined buying criteria match the seller defined selling criteria.

24. (Currently Amended) A system for conducting business electronically, comprising:

a central server;

at least one computer system coupled to the server via a network;

wherein a plurality of deals for a product offered for sale electronically is stored in the central server, each of the plurality of deals having different seller defined price and non-price selling criteria, and wherein the server is configured to receive orders for the product from a plurality of different buyers via the at least one remote computer system, by providing the
